

## **Open and Public Meetings (Summary of All Bills)**

### **H.B. 10 - Open and Public Meetings Act Amendments**

Corrects one problem with last year's bill which omitted constitutionally created bodies (such as the State Board) from definition of public bodies subject to the open meetings law. Also requires that written minutes include a summary of public comments and the date, time, and place of the meeting.

### **H.B. 204 - Modifications to Open and Public Meetings**

Modifies the definition of a meeting to include an in person or electronic meeting for the purpose of discussing, receiving comments from the public, or acting upon a matter the body has jurisdiction over. Deletes the definition of "public hearing" in response to this change. Also adds constitutionally created bodies to the definition of public bodies.

Allows a public body to discuss a non-agenda item raised by a member of the public provided the body does not take any action on the matter. Deletes the provision that allowed discussion of a non-agenda item raised by the body itself.

Requires notice of the time and place of, and topics to be discussed at an emergency meeting.

### **H.B. 222 S1 - Open and Public Meetings - Electronic Notice**

Requires posting of required public notice of open meetings on the Internet (State Board is already in compliance).

### **H.B. 257 - Open and Public Meeting Act Amendments**

Applies only to special districts created by counties.
